

IT ALL MAKES CENTS!!!

2013 HOUSEHOLD INCOME AND EXPENDITURES SURVEY

Survey takers will be visiting a random sample of households throughout Guam in March and April to collect information on household expenses, consumption, and income.

The Survey will provide information about:

- Numbers and characteristics of school children receiving free or reduced meals.
- Patterns of household expenditures to adjust weights for the Consumer Price Index
- The distribution of income and expenditures throughout Guam
- Home production activities
- Nutrition and food consumption patterns for Guam 's families
- The general health of Guam's population by age and sex, ethnicity, birthplace and migration
- Attitudes of Guam's population about the military build-up

Your answers will contribute in determining federal cost reimbursements for providing free and reduced meals to our school children. Answer the survey and help ensure our schools secure its fair share of funding to provide healthy, nutritious meals to our children.

Answer the survey to help improve Guam!
